

LAS Recycling Ltd

1st March 2025

Dear Customers,

Re: Trade Waste

It has now been nearly 12 months since the implementation of workplace recycling regulations in Wales. While the transition required significant effort, I am pleased to report that it has been successfully navigated. As a result of the new regulations, we have invested in four new vehicles along with over fifteen hundred wheelie bins, to ensure compliance and meet your demands,

As you may be aware, the UK is currently experiencing several unprecedented challenges that are impacting businesses and operations across all sectors. During this time, we appreciate your continued support and value your business.

From 1st April 2025, the UK Government will be implementing an increase in Landfill Tax. Additionally, we have experienced significant cost increases across various areas of our business. This includes the new workplace recycling regulations introduced by the Welsh Government last year, along with additional financial pressures from the Government's 2025 budget, including higher National Insurance contributions and above-inflation industry insurance increases, leading to rising overhead costs.

We have carefully assessed the impact of these factors on our operations to ensure a fair adjustment to our pricing. As a result, we write to inform you that our revised service rates will take effect from 1st April 2025. A breakdown of the new pricing is enclosed for your reference.

While we apologise for this adjustment, we appreciate your understanding and continued support. Please do not hesitate to reach out if you have any questions.

Yours Sincerely,

Mark Saunders
Managing Director
